Subject: **Preparation for the Council meeting (Environment) on 9 October 2018**
Proposal for a Regulation of the European Parliament and of the Council setting emission performance standards for new passenger cars and for new light commercial vehicles as part of the Union's integrated approach to reduce CO₂ emissions from light-duty vehicles and amending Regulation (EC) No 715/2007 (recast)
– General approach

I. INTRODUCTION

1. On 8 November 2017 the Commission submitted a proposal for a Regulation on setting new CO₂ emission standards for cars and vans. The aim of the proposal is inter alia to contribute to reaching the 30% reduction target by 2030 in the non-ETS sectors set by the European Council, as translated into the national targets in the Effort Sharing Regulation, and to achieving the objectives of the Paris Agreement.

2. To this end, the Commission suggests EU wide CO₂ emissions reduction targets for new passenger cars and vans from 2025 to 2029 and from 2030 compared to the targets for 2021 set by previous legislation (15 % from 2025 to 2029 for both cars and vans and 30 % from 2030 for both cars and vans).

The proposal maintains the mass of vehicles in the fleet as a parameter for calculating the specific targets for each manufacturer.

3. To progressively further the uptake of zero- and low-emission vehicles (ZLEV), the Commission proposal includes a mechanism from 2025 onwards to incentivise manufacturers to place a higher number of these vehicles on the market. If the share of zero- and low-emission vehicles of the manufacturer exceeds certain benchmarks, the manufacturer will be rewarded with less strict CO₂ emission targets. From 2025 to 2029 the benchmark is proposed to be 15% and from 2030 onwards, it is proposed to be 30%.
4. In the European Parliament the plenary is expected to vote on the proposal at the October I session (1 - 4 October 2018) following the vote of the draft report by the ENVI Committee on 10 September 2018.
5. The Economic and Social Committee delivered its opinion on 14 February 2018. The Committee of the Regions decided not to give an opinion.
6. The Council (Environment) held a policy debate on the proposal on 25 June 2018.

The proposal has been discussed at a number of meetings of the Environment Working Party, at the latest on 20 September 2018 on the basis of a Presidency compromise text. The Working Party has also examined the Impact assessment on the proposal.

STATE OF PLAY

7. Discussions so far within the Council have confirmed that the ambition level, i.e. the targets for 2025 and 2030 and the ZLEV incentive mechanism, are the main issues in the proposal, with delegations holding very divergent views. Some delegations have not been able to state any position yet.
8. Some delegations have during discussions expressed support for the ambition level proposed by the Commission, with indications on various extents of flexibility towards raising the ambition level.

However, a large group of delegations have throughout called for raising the ambition level, in particular arguing that this would be necessary in light of the national targets set out in the Effort Sharing Regulation and the objectives of the Paris Agreement and would also promote innovation and competitiveness. All of those delegations have called for raising the 2030 target for cars, whereas views have been more nuanced on the need to raise the 2025 target and on the ambition level for vans. They have generally supported having a ZLEV incentives mechanism. However, some wish to strengthen the mechanism proposed by the Commission, as a way to raise the ambition level and speed up the uptake of zero-and low-emission vehicles.

A number of delegations, concerned by the potential negative effects on jobs and competitiveness and costs for consumers, have consistently stated that the ambition level, and in particular the 2025 target, proposed by the Commission will already be challenging enough for the manufacturers. For some the Commission proposal has represented the maximum that they could accept, while others have called for lowering the ambition level as concerns either the 2025 target or the 2030 target or both. They have generally supported the ZLEV incentives mechanism as proposed by the Commission, however, with some calling for a better weighting of plug-in hybrids in the mechanism, arguing that these represent an important transition technology and that this should be acknowledged.

9. Whilst acknowledging that this Regulation cannot address the issue in substance, several delegations have stated that an important issue for them is the likely "intra-EU carbon leakage" in transport resulting from the proposal as a consequence of increased imports of second hand vehicles from high-income Member States to low-income Member States.
10. Against this background, and in order to focus discussions and start bringing positions closer, the Presidency presented a compromise text¹ where for cars the 2030 target is raised to 35%, while signalling that this figure was to be discussed further. In addition, the review to be carried out in 2024 by the Commission should consider further reductions beyond 2030 in light of the objectives of the Paris Agreement and possibly propose targets for 2040 onwards.

On the other hand, a more favourable weighting of plug-in hybrid cars in the ZLEV incentives mechanism was proposed, however, with the 2030 ZLEV benchmark for cars being raised to 35%, thereby matching the higher 2030 ambition level. This proposal would thus in particular facilitate manufacturers in meeting the 2025 target.

In addition, the compromise addressed the issue of second hand cars and a number of other issues discussed, in particular measures concerning the transition from NEDC to WLTP values aiming at ensuring robust and representative CO2 emissions values from manufacturers.

11. At the meeting of the Working Party on 20 September 2018, delegations who expressed themselves in general maintained their positions on the main issue of the level of ambition (targets and ZLEV incentives: Articles 1 and 4 and Annex I):
- Some delegations were positively inclined towards the compromise or signalled that the proposal goes in the right direction, with some still scrutinising certain elements of the compromise.
 - for a number of other delegations it goes too far, either because the ambition level as proposed by the Commission is too high (20 or 20-25% for the 2030 target was specifically mentioned), or because the Commission proposal is the maximum that they can accept. Some, however, expressed support for the proposed better weighting of plug-in hybrids.

¹ Doc. 12076/18

- conversely, for a majority of delegations, the compromise is not ambitious enough and some question what its overall effect will be on the level of ambition. Within this group, positions continue to vary on different aspects. Several wish to raise both the 2025 and 2030 targets, while others only the 2030 target. For 2025 a target of 25 % is suggested by several. Proposals on the level of targets for 2030 vary from around 40 to 50 to 40-70%, while some do not mention precise figures. However, some support a differentiation between cars and vans, including maintaining the Commission proposal for vans, while others prefer to have the same targets for cars and vans. Several wish to raise the ZLEV benchmarks further and add a "malus", while others seem content with the Commission proposal. Some have indicated that if the targets are sufficiently high they can be flexible on their demands for strengthening the ZLEV incentives. Others, however, are questioning whether a mechanism is called for at all if the targets are sufficiently high. A few delegations wish to privilege zero-emission vehicles in the mechanism. Most are doubtful on the proposed better weighting of the plug-in hybrids, assessing that it will weaken the targets.

Some delegations reiterated that they have no final position on the targets and/or the ZLEV incentives yet.

A number of delegations maintained their position on wanting to delete the mass utility parameter, arguing that it is linked to the level of ambition and is redundant, some explicitly mentioning that this concerns cars only. Others explicitly objected to a deletion, supporting the Commission proposal and arguing that the question of mass is rather linked to competition between manufacturers and that the mass parameter gradually is being phased out anyway.

The changes proposed to the review clause (Article 14) concerning long term ambitions, as well as financing of infrastructure and socio-economic aspects, were widely supported.

12. Further, and related to the level of ambition, delegations raised two issues:
- Niche derogation (Article 10): For some delegations maintaining the niche derogation beyond 2025 would be very important.
 - Eco-innovations (Article 11): One delegation disagreed with air conditioning becoming eligible as an eco-innovation. A few delegations considered that the cap on eco-innovations should be lowered to 5g and there should be a mechanism for removing the eco-innovation status. One delegation wanted the cap on eco-innovations to reflect the change from NEDC to WLTP. According to the Commission, the two latter points are covered by this Regulation and implementing regulations.
13. In addition, some other issues were raised by delegations at the Working Party on 20 September 2018, inter alia:
- On the recital (13a) on the second hand cars, some delegations wished to refer to "national and EU level".
 - On WLTP, although supporting the Presidency text, a few delegations were wondering whether provisions could be further strengthened to avoid deviations in the future. According to the Commission, measures had been proposed covering these concerns.
 - One delegation announced that it would make a suggestion for a recital on developing a test for measuring Real-Drive-Emission (RDE).
 - One delegation reiterated its proposal to include in the review clause (Article 14) an ex-ante evaluation of the introduction of a formal performance quota emission trading market mechanism among vehicle manufacturers.
14. On the basis of the discussions on 20 September 2018, the Presidency decided to table the text set out in the Annex to this note. The Presidency decided to maintain the substance of the text but did address some requests from delegations, including the issue of second hand cars.

II. CONCLUSION

15. The Permanent Representatives Committee is invited to:
- examine the compromise text in the Annex and resolve outstanding issues; and
 - forward it to the Council (Environment) for discussion at its meeting on 9 October 2018, with a view to reaching a general approach.
-

Proposal for a

REGULATION OF THE EUROPEAN PARLIAMENT AND OF THE COUNCIL

setting emission performance standards for new passenger cars and for new light commercial vehicles as part of the Union's integrated approach to reduce CO₂ emissions from light-duty vehicles and amending Regulation (EC) No 715/2007 (recast)².

(Text with EEA relevance)

THE EUROPEAN PARLIAMENT AND THE COUNCIL OF THE EUROPEAN UNION,

Having regard to the Treaty on the Functioning of the European Union, and in particular Article 192(1) thereof,

Having regard to the proposal from the European Commission,

After transmission of the draft legislative act to the national parliaments,

Having regard to the opinion of the European Economic and Social Committee,

Having regard to the opinion of the Committee of the Regions,

Acting in accordance with the ordinary legislative procedure,

² Changes to the previous text are **bold and underlined**. Deletions are marked as [...]. Previous changes are underlined.

Whereas:

- (1) Regulation (EC) No 443/2009 of the European Parliament and of the Council³ and Regulation (EU) No 510/2011 of the European Parliament and of the Council⁴ have been substantially amended several times. Since further amendments are to be made, those Regulations should be recast in the interests of clarity.
- (2) This Regulation should apply from 1 January 2020 in order to provide a coherent and efficient transition following the recast and repeal of Regulations (EC) No 443/2009 and (EU) No 510/2011. However, it is appropriate to maintain the CO₂ performance standards and the modalities for achieving them as set out in those Regulations without changes until 2024.
- (3) The Commission's Communication "A European Strategy for Low-Emission Mobility"⁵ sets a clear ambition: by mid-century, greenhouse gas emissions from transport will need to be at least 60% lower than in 1990 and be firmly on the path towards zero. Emissions of air pollutants from transport that harm our health need to be drastically reduced without delay. Emissions from conventional combustion engines will need to further reduce after 2020. Zero- and low emission vehicles will need to be deployed and gain significant market share by 2030.

³ Regulation (EC) No 443/2009 of the European Parliament and of the Council of 23 April 2009 setting emission performance standards for new passenger cars as part of the Community's integrated approach to reduce CO₂ emissions from light-duty vehicles (OJ L 140, 5.6.2009, p. 1).

⁴ Regulation (EU) No 510/2011 of the European Parliament and of the Council of 11 May 2011 setting emission performance standards for new light commercial vehicles as part of the Union's integrated approach to reduce CO₂ emissions from light-duty vehicles (OJ L 145, 31.5.2011, p. 1).

⁵ Communication from the Commission to the European Parliament, the Council, the European Economic and Social Committee and the Committee of the Regions: A European Strategy for Low-Emission Mobility (COM(2016) 501 final).

- (4) The Commissions Communications "Europe on the move"⁶ and "Delivering on the European Strategy for low-emission mobility A European Union that protects the planet, empowers its consumers, and defends its industry and workers"⁷ highlight that the CO₂ emissions standards for passenger cars and light commercial vehicles are a strong driver for innovation and efficiency and will contribute to strengthening competitiveness of the automotive industry and pave the way for zero and low-emission vehicles in a technology-neutral way.
- (5) This Regulation provides a clear pathway for CO₂ emissions reductions from the road transport sector and contributes to the binding target of at least a 40% domestic reduction in economy-wide greenhouse gas emissions by 2030 compared to 1990, as was endorsed in the Conclusions of the European Council of 23-24 October 2014, and approved as the Union Intended Nationally Determined Contribution under the Paris Agreement at the Environment Council meeting on 6 March 2015.
- (6) The European Council Conclusions of October 2014 endorsed a greenhouse gas emissions reduction of 30% by 2030 compared to 2005 for the sectors that are not part of the European Union emissions trading system. Road transport provides a major contribution to the emissions of those sectors, and its emissions remain significantly above 1990 levels. If the road transport emissions increase further, it will offset reductions made by other sectors to combat climate change.

⁶ Communication from the Commission to the European Parliament, the Council, the European Economic and Social Committee and the Committee of the Regions: EUROPE ON THE MOVE An agenda for a socially fair transition towards clean, competitive and connected mobility for all (COM(2017) 283 final).

⁷ Communication from the Commission to the European Parliament, the Council, the European Economic and Social Committee and the Committee of the Regions: "Delivering on low-emission mobility; A European Union that protects the planet, empowers its consumers and defends its industry and workers" (COM(2017) 675 final).

- (6a) The Paris Agreement, inter alia, sets out a long-term goal in line with the objective to keep the global average temperature increase well below 2 °C above pre industrial levels and to pursue efforts to keep it to 1,5 °C above pre-industrial levels. In order to meet this goal, further CO₂ emission reductions **also** for passenger cars and light commercial vehicles **beyond 2030** will be necessary.
- (7) The European Council Conclusions of October 2014 highlighted the importance of reducing greenhouse gas emissions and risks related to fossil fuel dependency in the transport sector through a comprehensive and technology neutral approach for the promotion of emissions reduction and energy efficiency in transport, for electric transportation and for renewable energy sources in transport also after 2020.
- (8) Energy efficiency contributing to moderation of demand is one of the five mutually-reinforcing and closely interrelated dimensions [...] set out in the Commission's Communication on "The Energy Union Strategy"⁸ [...], in order to give consumers in the Union secure, sustainable, competitive and affordable energy. The [...] Communication states that, while all economic sectors must take steps to increase the efficiency of their energy consumption, transport has a huge energy efficiency potential, which can be realised also with a continued focus on tightening CO₂ emission standards for passenger cars and light commercial vehicles in a 2030 perspective.

⁸ Communication from the Commission to the European Parliament, the Council, the European Economic and Social Committee, the Committee of the Regions and the European Investment Bank: A Framework Strategy for a Resilient Energy Union with a Forward-Looking Climate Change Policy (COM(2015) 80 final).

- (9) An evaluation of Regulations (EC) No 443/2009 and (EU) No 510/2011 in 2015 concluded that those Regulations have been relevant, broadly coherent, and have generated significant emissions savings, whilst being more cost-effective than originally anticipated. They have also generated significant added value for the Union that could not have been achieved to the same extent through national measures.
- (10) It is therefore appropriate to pursue the objectives of those Regulations by setting new EU fleet-wide CO₂ reduction targets for passenger cars and light commercial vehicles for the period up to 2030. In defining the reduction levels, account has been taken of their effectiveness in delivering a cost-effective contribution to reducing emissions of the sectors covered by the Effort Sharing Regulation [.../...] by 2030, of the resulting costs and savings for society, manufacturers and vehicle users, as well as of their direct and indirect implications for employment, competitiveness and innovation and the co-benefits generated in terms of reduced air pollution and energy security. [Considering that the market share and therefore the overall contribution of CO₂ emissions from passenger cars are significantly higher than those of light commercial vehicles, a differentiated approach between passenger cars and light commercial vehicles is considered appropriate.]

- (11) As part of the implementation of Regulation (EC) No 715/2007 of the European Parliament and of the Council⁹, a new test procedure for measuring CO₂ emissions from and fuel consumption of light duty vehicles, the Worldwide Harmonised Light Vehicles Test procedure (WLTP), set out in Commission Regulation (EU) 2017/1151¹⁰, entered into force in 2017. This [...] test procedure [...] provides CO₂ emission and fuel consumption values that are more representative of real world conditions. It is therefore appropriate that the new CO₂ emission targets should be based on the CO₂ emissions determined on the basis of that test procedure. Considering however that WLTP-based CO₂ emissions will be available for target compliance purposes from 2021, it is appropriate that the new emissions performance standards should be defined as reduction levels set in relation to the 2021 average of the specific emissions targets [...] calculated on the basis of the CO₂ emissions measured for the purpose of the WLTP emissions test. In order to ensure the robustness and representativeness of the values used as the starting point for defining the reduction levels to be applied in 2025 and 2030, the conditions for performing those measurements are to be clarified as part of the implementation of Implementing Regulations (EU) 2017/1152 and (EU) 2017/1153¹¹.
- (12) It is important that the setting of CO₂ emissions reduction requirements continues to provide Union-wide predictability and planning security for vehicle manufacturers across their new car and light commercial vehicle fleets in the Union.

⁹ Regulation (EC) No 715/2007 of the European Parliament and of the Council of 20 June 2007 on type approval of motor vehicles with respect to emissions from light passenger and commercial vehicles (Euro 5 and Euro 6) and on access to vehicle repair and maintenance information (OJ L 171, 29.6.2007, p. 1).

¹⁰ Commission Regulation (EU) 2017/1151 of 1 June 2017 supplementing Regulation (EC) No 715/2007 of the European Parliament and of the Council on type-approval of motor vehicles with respect to emissions from light passenger and commercial vehicles (Euro 5 and Euro 6) and on access to vehicle repair and maintenance information, amending Directive 2007/46/EC of the European Parliament and of the Council, Commission Regulation (EC) No 692/2008, and Commission Regulation (EU) No 1230/2012 and repealing Commission Regulation (EC) No 692/2008 (OJ L 175, 7.7.2017, p.1).

¹¹ To be updated following adoption of the implementing regulations.

- (13) Reduction levels for the Union-wide fleets of new passenger cars and light commercial vehicles should therefore be set for 2025 and for 2030, taking into account the vehicle fleet renewal time and the need for the road transport sector to contribute to the 2030 climate and energy targets. This stepwise approach also provides a clear and early signal for the automotive industry not to delay the market introduction of energy efficient technologies and zero- and low-emission vehicles.
- (13a) The CO2 emission performance standards set out in this Regulation apply to new passenger cars and light commercial vehicles. With regard to the existing fleet of light duty vehicles, including second-hand vehicles, additional measures aimed at reducing emissions may also be taken, inter alia, at national and EU level.
- (14) While the Union is among the world's major producers of motor vehicles and demonstrates technological leadership in this sector, competition is increasing and the global automotive sector is changing rapidly through new innovations in electrified powertrains, and cooperative, connected and automated mobility. In order to retain its global competitiveness and access to markets, the Union needs a regulatory framework, including a particular incentive in the area of zero- and low-emission vehicles, which contributes to creating a large home market and supports technological development and innovation.
- (15) A dedicated incentive mechanism should be introduced to facilitate a smooth transition towards zero-emission mobility. This crediting mechanism should be designed so as to promote the deployment on the Union market of zero- and low-emission vehicles.
- (16) Setting [...] benchmarks for the share of zero- and low-emission vehicles in the EU fleet together with a well-designed mechanism for adjusting a manufacturer's specific CO₂ target based on the share of zero- and low-emission vehicles in the manufacturer's own fleet should provide a strong and credible signal for the development and deployment of such vehicles while still allowing for the further improvement of the efficiency of the conventional internal combustion engines.

- (17) In determining the credits for the zero- and low-emission vehicles, it is appropriate to account for the difference in CO₂ emissions between the vehicles. As concerns passenger cars, the importance of low-emission vehicles, in particular plug-in hybrid vehicles, for the transition towards zero-emission vehicles should be appropriately recognised when determining the credits. The adjustment mechanism should ensure that a manufacturer exceeding the benchmark level would benefit from a higher specific CO₂ target. In order to ensure a balanced approach, limits should be set to the level of adjustment possible within that mechanism. This will provide for incentives, promoting a timely roll-out of recharging and refuelling infrastructure and yielding high benefits for consumers, competitiveness, and the environment.
- (18) The legislative framework for implementing the average new car and light commercial vehicle fleet target should ensure competitively neutral, socially equitable and sustainable reduction targets which take account of the diversity of European automobile manufacturers and avoid any unjustified distortion of competition between them.
- (19) In order to maintain the diversity of the market for passenger cars and light commercial vehicles and its ability to cater for different consumer needs, CO₂ targets should be defined according to the utility of the vehicles on a linear basis.

Maintaining mass as the utility parameter is considered coherent with the existing regime. In order to better reflect the mass of vehicles used on the road, the parameter should be changed with effect from 2025 from mass in running order to the vehicle's test mass as specified in the WLTP test procedure adopted on the basis of Regulation [...] (EC) No 715/2007.

- (20) It should be avoided that the EU fleet-wide targets are altered due to changes in the average mass of the fleet. Changes in the average mass should therefore be reflected without delay in the specific emission target calculations, and the adjustments of the average mass value that is used to this end should therefore take place every two years with effect from 2025.

- (21) In order to distribute the emission reduction effort in a competitively neutral and fair way that reflects the diversity of the market for passenger cars and light commercial vehicles, and in view of the change in 2021 to WLTP-based specific emission targets, it is appropriate to determine the slope of the limit value curve on the basis of the specific emissions of all newly registered vehicles in that year, and to take into account the change in the EU fleet-wide targets between 2021, 2025 and 2030 with a view to ensuring an equal reduction effort of all manufacturers. With regard to light commercial vehicles, the same approach as that for car manufacturers should apply to manufacturers of lighter, car derived, vans, while for manufacturers of vehicles falling within the heavier segments, a higher and fixed slope should be set for the whole target period.
- (22) [...] This Regulation [...] aims to achieve its objectives by, inter alia, creating [...] incentives for the automotive industry to invest in new technologies. This Regulation actively promotes eco-innovation and provides a mechanism that should be able to acknowledge future technological development.

Experience shows that eco-innovations have successfully contributed to the cost-effectiveness of Regulations (EC) No 443/2009 and (EU) No 510/2011 and to the reduction of real world CO₂ emissions. This modality should therefore be maintained and the scope should be extended to incentivise efficiency improvements in air-conditioning systems.

- (23) A balance should however be ensured between incentives given to eco-innovations and those technologies for which the emission reduction effect is demonstrated on the official test procedure. As a consequence, it is appropriate to maintain a cap on the eco-innovation savings that a manufacturer may take into account for target compliance purposes. The Commission should have the possibility to review the level of the cap, in particular, to take into account the effects of the change in the official test procedure. It is also appropriate to clarify how the savings should be calculated for target compliance purposes.

- (24) Directive 2007/46/EC establishes a harmonised framework containing the administrative provisions and general technical requirements for approval of all new vehicles within its scope. The entity responsible for complying with this Regulation should be the same as the entity responsible for all aspects of the type-approval process in accordance with Directive 2007/46/EC and for ensuring conformity of production.
- (25) For the purposes of type-approval, specific requirements apply for special-purpose vehicles, as defined in Annex II of Directive 2007/46/EC, and they should therefore be excluded from the scope of this Regulation.
- (26) It is not appropriate to use the same method to determine the emissions reduction targets for large-volume manufacturers as for small-volume manufacturers considered as independent on the basis of the criteria set out in this Regulation. Such small-volume manufacturers should have the possibility to apply for alternative emissions reduction targets relating to the technological potential of a given manufacturer's vehicles to reduce their specific emissions of CO₂ and consistent with the characteristics of the market segments concerned.
- (27) In recognition of the disproportionate impact on the smallest manufacturers resulting from compliance with specific emissions targets defined on the basis of the utility of the vehicle, the high administrative burden of the derogation procedure, and the marginal resulting benefit in terms of CO₂ emissions reduction from the vehicles sold by those manufacturers, manufacturers responsible for fewer than 1 000 new passenger cars and new light commercial vehicles registered in the Union annually should be excluded from the scope of the specific emissions target and the excess emissions premium.

However, where a manufacturer that is covered by an exemption nevertheless applies for and is granted a derogation, it is appropriate that the manufacturer should be required to comply with that derogation target.

- (28) The procedure for granting derogations from the 95 g CO₂/km fleet target to niche car manufacturers ensures that the reduction effort required by niche manufacturers is consistent with that of large volume manufacturers with regard to that target. However, experience shows that niche manufacturers have the same potential as large manufacturers to meet the CO₂ targets and with regard to the targets set from 2025 onwards it is not considered appropriate to distinguish between those two categories of manufacturers.
- (29) In determining the average specific emissions of CO₂ for all the new cars and new light commercial vehicles registered in the Union for which manufacturers are responsible, all cars and light commercial vehicles should be taken into account irrespective of their mass or other characteristics. Although Regulation (EC) No 715/2007 does not cover passenger cars and light commercial vehicles with a reference mass exceeding 2 610 kg and to which type approval is not extended in accordance with Article 2(2) of that Regulation [...], the emissions for these vehicles should be measured in accordance with the same measurement procedures as specified for light duty vehicles pursuant to Regulation (EC) No 715/2007, notably the procedures set out in Commission Regulation (EC) No 692/2008¹² and in Regulation (EU) 2017/1151, and the correlation procedures adopted on the basis of Regulation (EC) No 443/2009 and (EU) No 510/2011, notably Commission Implementing Regulations (EU) 2017/1152¹³ and (EU) 2017/1153¹⁴. The resulting CO₂ emission values should be entered in the certificate of conformity of the vehicle in order to enable their inclusion in the monitoring scheme.

¹² Commission Regulation (EC) No 692/2008 of 18 July 2008 implementing and amending Regulation (EC) No 715/2007 of the European Parliament and of the Council on type-approval of motor vehicles with respect to emissions from light passenger and commercial vehicles (Euro 5 and Euro 6) and on access to vehicle repair and maintenance information (OJ L 199, 28.7.2008, p. 1).

¹³ Commission Implementing Regulation (EU) 2017/1152 of 2 June 2017 setting out a methodology for determining the correlation parameters necessary for reflecting the change in the regulatory test procedure with regard to light commercial vehicles and amending Implementing Regulation (EU) No 293/2012 (OJ L 175, 7.7.2017, p. 644).

¹⁴ Commission Implementing Regulation (EU) 2017/1153 of 2 June 2017 setting out a methodology for determining the correlation parameters necessary for reflecting the change in the regulatory test procedure and amending Regulation (EU) No 1014/2010 (OJ L 175, 7.7.2017, p. 679).

- (30) The specific emissions of CO₂ of completed light commercial vehicles should be allocated to the manufacturer of the base vehicle.
- (31) Consideration should be given to the specific situation of manufacturers of light commercial vehicles producing incomplete vehicles that are type approved in multiple stages. While those manufacturers are responsible for meeting the CO₂ emission targets, they should have the possibility to predict with reasonable certainty the CO₂ emissions of the completed vehicles. The Commission should ensure that those needs are appropriately reflected in the implementing measures adopted pursuant to Regulation [...] (EC) No 715/2007.
- (32) In order to provide for flexibility for the purposes of meeting their targets under this Regulation, manufacturers may agree to form a pool on an open, transparent and non-discriminatory basis. An agreement to form a pool should not exceed five years but may be renewed. Where manufacturers form a pool, they should be deemed to have met their targets under this Regulation provided that the average emissions of the pool as a whole do not exceed the specific emissions target for the pool.
- (33) The possibility for manufacturers to form pools has proven a cost-effective way to achieve compliance with the CO₂ emissions targets, in particular facilitating compliance for those manufacturers that produce a limited range of vehicles. In order to improve the competitive neutrality, the Commission should have the powers to clarify the conditions on which independent manufacturers may form a pool in order to allow them to be placed in a position equivalent to connected undertakings.
- (34) A robust compliance mechanism is necessary in order to ensure that the targets under this Regulation are met.

- (35) It is also essential for achieving the CO₂ reductions required under this Regulation, that the emissions of vehicles in use are in conformity with the CO₂ values determined at type approval. It should therefore be possible for the Commission to take into account in the calculation of the average specific emissions of a manufacturer any systemic non-conformity found by type approval authorities with regard to the CO₂ emissions of vehicles in use.
- (36) In order to be in position to take such measures the Commission should have the powers to prepare and implement a procedure for verifying the in-service conformity of the CO₂ emissions of light duty vehicles placed on the market. For that purpose Regulation (EC) No 715/2007 should be amended.
- (37) The specific emissions of CO₂ from new passenger cars and light commercial vehicles are measured on a harmonised basis in the Union according to the methodology laid down in Regulation (EC) No 715/2007. To minimise the administrative burden of this Regulation, compliance should be measured by reference to data on registrations of new cars and light commercial vehicles in the Union collected by Member States and reported to the Commission. To ensure the consistency of the data used to assess compliance, the rules for the collection and reporting of this data should be harmonised as far as possible. The competent authorities' responsibility to provide correct and complete data should therefore be clearly stated as well as the need for an effective cooperation between those authorities and the Commission in addressing data quality issues.
- (38) Manufacturers' compliance with the targets under this Regulation should be assessed at Union level. Manufacturers whose average specific emissions of CO₂ exceed those permitted under this Regulation should pay an excess emissions premium with respect to each calendar year. The amounts of the excess emissions premium should be considered as revenue for the general budget of the Union.

- (39) Any national measure that Member States may maintain or introduce in accordance with Article 193 of the Treaty on the Functioning of the European Union (TFEU) should not, in consideration of the purpose of and procedures established in this Regulation, impose additional or more stringent penalties on manufacturers who fail to meet their targets under this Regulation.
- (40) This Regulation should be without prejudice to the full application of Union competition rules.
- (41) The effectiveness of the targets set out in this Regulation in reducing CO₂ emissions in reality is strongly dependent on the representativeness of the official test procedure. In accordance with the Opinion of the Scientific Advice Mechanism (SAM)¹⁵ and the recommendation of the European Parliament, following its inquiry into emission measurements in the automotive sector¹⁶, a mechanism should be put in place to assess the real world representativeness of vehicle CO₂ emissions and energy consumption values determined in accordance with [...] the WLTP test procedure adopted on the basis of Regulation (EC) No 715/2007. The Commission should have the powers to ensure the public availability of such data, whilst providing for the protection of any personal data, and, where necessary, develop the procedures needed for identifying and collecting the data required for performing such assessments.

¹⁵ High Level Group of Scientific Advisors, Scientific Opinion 1/2016 "Closing the gap between light-duty vehicle real-world CO₂ emissions and laboratory testing"

¹⁶ European Parliament recommendation of 4 April 2017 to the Council and the Commission following the inquiry into emission measurements in the automotive sector (2016/2908(RSP))

- (42) In 2024 it is foreseen to review the progress achieved under the [Effort Sharing Regulation and Emissions Trading System Directive]. It is therefore appropriate to comprehensively assess the effectiveness of this Regulation in that same year to allow a coordinated and coherent assessment of the measures implemented under all these instruments. In this review the Commission should also identify a clear pathway for further CO₂ emission reductions for passenger cars and light commercial vehicles beyond 2030 in order to **significantly** contribute to achieving the long-term goal of the Paris Agreement. Where appropriate, the report on this review should be accompanied by a proposal for amending this Regulation.
- (43) Regulations (EC) No 443/2009 and (EU) No 510/2011 should be repealed with effect from 1 January 2020.
- (44) In order to ensure uniform conditions for the implementation of this Regulation , implementing powers should be conferred on the Commission.
- [...] The implementing powers relating to [...] the specification of detailed conditions for pooling arrangements, procedures for monitoring and reporting of data on average emissions as well as procedures for taking into account deviations found in the CO₂ emissions of vehicles when calculating the average specific emissions of a manufacturer, determination of the means for collecting excess emissions premiums, procedures to approve the innovative technologies or innovative technology packages achieving CO₂ savings, measures allowing the monitoring and assessment of the real world world representativeness of the CO₂ emission and energy consumption values determined in accordance with the WLTP test procedure and [...] determination of the correlation parameters necessary in order to reflect any change in the regulatory test procedure for the measurement of specific CO₂ emissions should be exercised in accordance with Regulation (EU) No 182/2011 of the European Parliament and of the Council¹⁷.

¹⁷ Regulation (EU) No 182/2011 of the European Parliament and of the Council of 16 February 2011 laying down the rules and general principles concerning mechanisms for control by Member States of the Commission's exercise of implementing powers (OJ L 55, 28.2.2011, p.13).

- (46) In order to amend [...] non-essential elements of the provisions of this Regulation the power to adopt acts in accordance with Article 290 of the Treaty on the Functioning of the European Union (TFEU) should be delegated to the Commission in respect of amending Annexes II and III as regards data requirements and data parameters, [...], adjusting the figures of M_0 and TM_0 , [...] and of the 7 g CO₂/km cap [...] for the total contributions of innovative technologies, and [...] adapting the formulae [...] for calculating the specific emission targets to reflect the change in the regulatory test procedure. In order to supplement non-essential elements of the provisions of this Regulation the power to adopt acts in accordance with Article 290 of the TFEU should be delegated to the Commission in respect of supplementing the rules on the interpretation of the eligibility criteria for derogations for certain manufacturers from the specific emissions targets, on the content of the applications for a derogation and on the content and assessment of programmes for the reduction of specific emissions of CO₂ with respect to certain manufacturers. It is of particular importance that the Commission carry out appropriate consultations during its preparatory work, including at expert level, and that those consultations be conducted in accordance with the principles laid down in the Interinstitutional Agreement of 13 April 2016 on Better Law-Making¹⁸. In particular, to ensure equal participation in the preparation of delegated acts, the European Parliament and the Council [...] receive all documents at the same time as Member States' experts, and their experts [...] systematically have access to meetings of Commission expert groups dealing with the preparation of delegated acts.
- (47) Since the objective of this Regulation, namely the establishment of CO₂ emissions performance requirements for new passenger cars and new light commercial vehicles, cannot be sufficiently achieved by the Member States, [...] but can rather, by reason of its scale and effects, be better achieved at Union level, the Union may adopt measures, in accordance with the principle of subsidiarity as set out in Article 5 of the Treaty on European Union. In accordance with the principle of proportionality, as set out in that Article, this Regulation does not go beyond what is necessary in order to achieve that objective,

¹⁸ OJ L 123, 12.5.2016, p. 1.

HAVE ADOPTED THIS REGULATION:

Article 1

Subject matter and objectives

1. This Regulation establishes CO₂ emissions performance requirements for new passenger cars and for new light commercial vehicles to contribute to fulfilling the Union's target of reducing its greenhouse gas emissions [...] as laid down in Regulation (EU) No 2018/...[Effort Sharing Regulation] and to achieving the objectives of the Paris Agreement and to ensure the proper functioning of the internal market.
2. From 1 January 2020, this Regulation sets an EU fleet-wide target of 95 g CO₂/km for the average emissions of new passenger cars and an EU fleet-wide target of 147 g CO₂/km for the average emissions of new light commercial vehicles registered in the Union, as measured until 31 December 2020 in accordance with Regulation (EC) No 692/2008 together with Implementing Regulations (EU) 2017/1152 and (EU) 2017/1153, and, from 1 January 2021 measured in accordance with Regulation (EU) 2017/1151.
3. This Regulation will until 31 December 2024 be complemented by additional measures corresponding to a reduction of 10 g CO₂/km as part of the Union 's integrated approach referred to in the 2007 Communication from the Commission to the Council and the European Parliament¹⁹.

¹⁹ Communication from the Commission to the Council and the European Parliament of 7 February 2007 Results of the review of the Community Strategy to reduce CO₂ emissions from passenger cars and light-commercial vehicles (COM(2007) 19 final).

4. From 1 January 2025 the following EU fleet-wide targets shall apply:
 - (a) for the average emissions of the new passenger car fleet, an EU fleet-wide target equal to a 15% reduction of the average of the specific emissions targets in 2021 determined in accordance with point 6.1.1 of Part A of Annex I;
 - (b) for the average emissions of the new light commercial vehicles fleet, an EU fleet-wide target equal to a 15% reduction of the average of the specific emissions targets in 2021 determined in accordance with point 6.1.1 of Part B of Annex I;
5. From 1 January 2030 the following targets shall apply:
 - (a) for the average emissions of the new passenger car fleet, an EU fleet-wide target equal to a [...] [35 %] reduction of the average of the specific emissions targets in 2021 determined in accordance with point 6.1.2 of Part A of Annex I;
 - (b) for the average emissions of the new light commercial vehicles fleet, an EU fleet-wide target equal to a 30% reduction of the average of the specific emissions targets in 2021 determined in accordance with point 6.1.2 of Part B of Annex I.

Article 2

Scope

1. This Regulation shall apply to the following motor vehicles :
 - (a) category M₁ as defined in Annex II to Directive 2007/46/EC ('passenger cars') which are registered in the Union for the first time and which have not previously been registered outside the Union ('new passenger cars');

- (b) category N₁ as defined in Annex II to Directive 2007/46/EC with a reference mass not exceeding 2 610 kg and category N₁ to which type-approval is extended in accordance with Article 2(2) of Regulation (EC) No 715/2007 ('light commercial vehicles') which are registered in the Union for the first time and which have not previously been registered outside the Union ('new light commercial vehicles').
2. A previous registration outside the Union made less than three months before registration in the Union shall not be taken into account.
 3. This Regulation shall not apply to special purpose vehicles as defined in point 5 of Part A to Annex II to Directive 2007/46/EC.
 4. Article 4, Article 7 (4)(b) and (c), Article 8 and Article 9(1)(a) and (c) shall not apply to a manufacturer which, together with all of its connected undertakings, is responsible for fewer than 1 000 new passenger cars or for fewer than 1 000 new light commercial vehicles registered in the Union in the previous calendar year, unless that manufacturer applies for and is granted a derogation in accordance with Article 10.

Article 3

Definitions

1. For the purposes of this Regulation, the following definitions shall apply:
 - (a) 'average specific emissions of CO₂' means, in relation to a manufacturer, the average of the specific emissions of CO₂ of all new passenger cars or of all new light commercial vehicles of which it is the manufacturer;
 - (b) 'certificate of conformity' means the certificate referred to in Article 18 of Directive 2007/46/EC;

- (c) ‘completed vehicle’ means a light commercial vehicle where type-approval is granted following completion of a process of multi-stage type-approval in accordance with Directive 2007/46/EC;
- (d) ‘complete vehicle’ means any light commercial vehicle which does not need to be completed in order to meet the relevant technical requirements of Directive 2007/46/EC;
- (e) ‘base vehicle’ means any light commercial vehicle which is used at the initial stage of a multi-stage type-approval process;
- (f) ‘manufacturer’ means the person or body responsible to the approval authority for all aspects of the EC type-approval procedure in accordance with Directive 2007/46/EC and for ensuring conformity of production;
- (g) ‘mass in running order ’ means the mass of the passenger car or light commercial vehicle with bodywork in running order as stated in the certificate of conformity and defined in section 2.6 of Annex I to Directive 2007/46/EC;
- (h) ‘specific emissions of CO₂’ means the CO₂ emissions of a passenger car or a light commercial vehicle measured in accordance with Regulation (EC) No 715/2007 and its implementing Regulations and specified as the CO₂ mass emission (combined) in the certificate of conformity of the vehicle. For passenger cars or light commercial vehicles which are not type-approved in accordance with Regulation (EC) No 715/2007, ‘specific emissions of CO₂’ means the CO₂ emissions measured pursuant to Regulation (EC) No 715/2007, notably in accordance with the same measurement procedure as specified in Regulation (EC) No 692/2008 until 31 December 2020, and from 1 January 2021 in Regulation (EU) 2017/1151, or in accordance with procedures adopted by the Commission to establish the CO₂ emissions for such vehicles;

- (i) ‘footprint’ means the average track width multiplied by the wheelbase as stated in the certificate of conformity and defined in Sections 2.1 and 2.3 of Annex I to Directive 2007/46/EC;
- (j) ‘specific emissions target’ means, in relation to a manufacturer, the annual target determined in accordance with Annex I or, if the manufacturer is granted a derogation in accordance with Article 10 the specific emissions target determined according to that derogation;
- (k) ‘EU fleet-wide target’ means the average CO₂ emissions of all new passenger cars or all new light commercial vehicles to be achieved in a given period;
- (l) ‘test mass’ means the test mass of a passenger car or light commercial vehicle as stated in the certificate of conformity and as defined in point 3.2.25 of Annex XXI to Regulation (EU) 2017/1151;
- (m) ‘zero- and low-emission vehicle’ means a passenger car or a light commercial vehicle with tailpipe emissions from zero up to 50 g CO₂/km, as determined in accordance with Regulation (EU) 2017/1151.
- (n) ‘payload’ means the difference between the technically permissible maximum laden mass pursuant to Annex II to Directive 2007/46/EC and the mass of the vehicle.

2. For the purposes of this Regulation ‘a group of connected manufacturers’ means a manufacturer and its connected undertakings. In relation to a manufacturer, ‘connected undertakings’ means:

- (a) undertakings in which the manufacturer has, directly or indirectly:
 - (i) the power to exercise more than half the voting rights; or

- (ii) the power to appoint more than half the members of the supervisory board, board of management or bodies legally representing the undertaking; or
 - (iii) the right to manage the undertaking's affairs;
- (b) undertakings which directly or indirectly have, over the manufacturer, the rights or powers listed in point (a);
 - (c) undertakings in which an undertaking referred to in point (b) has, directly or indirectly, the rights or powers listed in point (a);
 - (d) undertakings in which the manufacturer together with one or more of the undertakings referred to in points (a), (b) or (c), or in which two or more of the latter undertakings, jointly have the rights or powers listed in point (a);
 - (e) undertakings in which the rights or the powers listed in point (a) are jointly held by the manufacturer or one or more of its connected undertakings referred to in points (a) to (d) and one or more third parties.

Article 4

Specific emissions targets

- 1. The manufacturer shall ensure that its average specific emissions of CO₂ do not exceed the following specific emissions targets:
 - (a) for calendar year 2020, the specific emissions target determined in accordance with points 1 and 2 of Part A of Annex I in the case of passenger cars, or points 1 and 2 of Part B of Annex I in the case of light commercial vehicles, or where a manufacturer is granted a derogation under Article 10, in accordance with that derogation;

- (b) for each calendar year from 2021 until 2024, the specific emissions target determined in accordance with points 3 and 4 of Parts A or B of Annex I as appropriate or, where a manufacturer is granted a derogation under Article 10, in accordance with that derogation and point 5 of Parts A or B of Annex I;
- (c) for each calendar year, starting from 2025, the specific emissions targets determined in accordance with point 6.3 of Parts A or B of Annex I.
2. In the case of light commercial vehicles, where the specific emissions of the completed vehicle are not available, the manufacturer of the base vehicle shall use the specific emissions of the base vehicle for determining its average specific emissions of CO₂.
3. For the purposes of determining each manufacturer's average specific emissions of CO₂, the following percentages of each manufacturer's new passenger cars registered in the relevant year shall be taken into account:
- 95 % in 2020,
 - 100 % from 2021 onwards.

Article 5

Super-credits for 95 g CO₂/km target

In calculating the average specific emissions of CO₂, each new passenger car with specific emissions of CO₂ of less than 50 g CO₂/km shall be counted as:

2 passenger cars in 2020,

1,67 passenger cars in 2021,

1,33 passenger cars in 2022,

1 passenger car from 2023,

for the year in which it is registered in the period from 2020 to 2022, subject to a cap of 7,5 g CO₂/km over that period for each manufacturer [...] as calculated in accordance with Article 5 of Implementing Regulation (EU) 2017/1153.

Article 6

Pooling

1. Manufacturers , other than manufacturers which have been granted a derogation under Article 10, may form a pool for the purposes of meeting their obligations under Article 4.
2. An agreement to form a pool may relate to one or more calendar years, provided that the overall duration of each agreement does not exceed five calendar years, and must be entered into on or before 31 December in the first calendar year for which emissions are to be pooled. Manufacturers which form a pool shall file the following information with the Commission:
 - (a) the manufacturers who will be included in the pool;

- (b) the manufacturer nominated as the pool manager who will be the contact point for the pool and will be responsible for paying any excess emissions premium imposed on the pool in accordance with Article 8;
 - (c) evidence that the pool manager will be able to fulfil the obligations under point (b);
 - (d) the category of vehicles registered as M₁ or N₁, for which the pool shall apply.
3. Where the proposed pool manager fails to meet the requirement to pay any excess emissions premium imposed on the pool in accordance with Article 8 , the Commission shall notify the manufacturers.
4. Manufacturers included in a pool shall jointly inform the Commission of any change of pool manager or of its financial status, in so far as this may affect its ability to meet the requirement to pay any excess emissions premium imposed on the pool in accordance with Article 8 and of any changes to the membership of the pool or the dissolution of the pool.
5. Manufacturers may enter into pooling arrangements provided that their agreements comply with Articles 101 and 102 TFEU and that they allow open, transparent and non-discriminatory participation on commercially reasonable terms by any manufacturer requesting membership of the pool. Without prejudice to the general applicability of Union competition rules to such pools, all members of a pool shall in particular ensure that neither data sharing nor information exchange may occur in the context of their pooling arrangement, except in respect of the following information:
- (a) the average specific emissions of CO₂;
 - (b) the specific emissions target;
 - (c) the total number of vehicles registered.

6. Paragraph 5 shall not apply where all the manufacturers included in the pool are part of the same group of connected manufacturers.
7. Except where notification is given under paragraph 3, the manufacturers in a pool in respect of which information is filed with the Commission shall be considered as one manufacturer for the purposes of meeting their obligations under Article 4. Monitoring and reporting information in respect of individual manufacturers as well as any pools will be recorded, reported and made available in the central register referred to in Article 7(4).
8. The Commission may specify the detailed conditions that shall apply for a pooling arrangement set up pursuant to paragraph 5 by way of implementing acts to be adopted in accordance with the examination procedure referred to in Article 15(2).

Article 7

Monitoring and reporting of average emissions

1. For each calendar year, each Member State shall record information for each new passenger car and each new light commercial vehicle registered in its territory in accordance with Parts A of Annexes II and III. This information shall be made available to the manufacturers and their designated importers or representatives in each Member State. Member States shall make every effort to ensure that reporting bodies operate in a transparent manner. Each Member State shall ensure that the specific emissions of CO₂ of passenger cars which are not type-approved in accordance with Regulation (EC) No 715/2007 are measured and recorded in the certificate of conformity.
2. By 28 February of each year, each Member State shall determine and transmit to the Commission the information listed in Parts A of Annexes II and III in respect of the preceding calendar year. The data shall be transmitted in accordance with the format specified in Part B of Annex II and Part C of Annex III.

3. On request from the Commission, a Member State shall also transmit the full set of data collected pursuant to paragraph 1.
4. The Commission shall keep a central register of the data reported by Member States under this Article and by 30 June of each year shall provisionally calculate the following for each manufacturer:
 - (a) the average specific emissions of CO₂ in the preceding calendar year;
 - (b) the specific emissions target in the preceding calendar year;
 - (c) the difference between its average specific emissions of CO₂ in the preceding calendar year and its specific emissions target for that year.

The Commission shall notify each manufacturer of its provisional calculation for that manufacturer. The notification shall include data for each Member State on the number of new passenger cars and of new light commercial vehicles registered and their specific emissions of CO₂.

The register shall be publicly available.

5. Manufacturers may, within three months of being notified of the provisional calculation under paragraph 4, notify the Commission of any errors in the data, specifying the Member State in which it considers that the error occurred.

The Commission shall consider any notifications from manufacturers and shall, by 31 October, either confirm or amend the provisional calculations under paragraph 4.

6. Member States shall designate a competent authority for the collection and communication of the monitoring data in accordance with this Regulation and shall inform the Commission of the competent authority designated .

The competent authorities shall ensure the correctness and completeness of the data transmitted to the Commission, and shall [...] provide a contact point that shall be available to respond quickly to requests from the Commission to address errors and omissions in the transmitted datasets.

7. The Commission shall adopt detailed rules on the procedures for monitoring and reporting of data under paragraphs 1 to 7 and on the application of Annex II by means of implementing acts. Those implementing acts shall be adopted in accordance with the examination procedure referred to in Article 15(2).

- 7a. The Commission shall be empowered to adopt delegated acts in accordance with Article 16 in order to amend the data requirements and data parameters set out in Annex II and III.

8. Type approval authorities shall without delay report to the Commission deviations found in the CO₂ emissions of vehicles in service as compared to those values indicated in the certificates of conformity as a result of verifications performed in accordance with the procedure referred to in [Article 11a] of Regulation (EC) No 715/2007.

The Commission shall take those deviations into account for the purpose of calculating the average specific emissions of a manufacturer.

The Commission [...] shall adopt detailed rules on the procedures for reporting such deviations and for taking them into account in the calculation of the average specific emissions. Those procedures shall be adopted by way of implementing acts in accordance with the examination procedure referred to in Article 15(2).

9. Member States shall also collect and report data, in accordance with this Article, on registrations of vehicles in categories M₂ and N₂ as defined in Annex II to Directive 2007/46/EC with a reference mass not exceeding 2 610 kg and vehicles to which type approval is extended in accordance with Article 2(2) of Regulation (EC) No 715/2007.

Article 8

Excess emissions premium

1. In respect of each calendar year, the Commission shall impose an excess emissions premium on a manufacturer or pool manager, as appropriate, where a manufacturer's average specific emissions of CO₂ exceed its specific emissions target.
2. The excess emissions premium under paragraph 1 shall be calculated using the following formula:

(Excess emissions × EUR 95) × number of newly registered vehicles.

For the purposes of this Article the following definitions shall apply:

- ‘excess emissions’ means the positive number of grams per kilometre by which a manufacturer's average specific emissions of CO₂, taking into account CO₂ emissions reductions due to innovative technologies approved in accordance with Article 11, exceeded its specific emissions target in the calendar year or part thereof to which the obligation under Article 4 applies, rounded to the nearest three decimal places, and
- ‘number of newly registered vehicles’ means the number of new passenger cars or new light commercial vehicles counted separately of which it is the manufacturer and which were registered in that period according to the phase-in criteria as set out in Article 4(3).

3. The Commission shall determine the means for collecting excess emissions premiums under paragraph 1 by means of implementing acts. Those implementing acts shall be adopted in accordance with the examination procedure referred to in Article 15(2).
4. The amounts of the excess emissions premium shall be considered as revenue for the general budget of the Union.

Article 9

Publication of performance of manufacturers

1. By 31 October of each year, the Commission shall publish by means of implementing acts a list indicating:
 - (a) for each manufacturer, its specific emissions target for the preceding calendar year;
 - (b) for each manufacturer, its average specific emissions of CO₂ in the preceding calendar year;
 - (c) the difference between the manufacturer's average specific emissions of CO₂ in the preceding calendar year and its specific emissions target in that year;
 - (d) the average specific emissions of CO₂ for all new passenger cars and new light commercial vehicles registered in the Union in the previous calendar year;
 - (e) the average mass in running order for all new passenger cars and new light commercial vehicles registered in the Union in the preceding calendar year until 31 December 2020;
 - (f) the average test mass of all new passenger cars and new light commercial vehicles registered in the Union in the preceding calendar year.

2. The list published under paragraph 1 shall also indicate whether the manufacturer has complied with the requirements of Article 4 with respect to the preceding calendar year.
3. The list referred to in paragraph 1 shall, for the publication by 31 October 2022, indicate the following:
 - (a) the 2025 and 2030 EU fleet-wide targets referred to in Article 1(4) and (5) calculated by the Commission in accordance with points 6.1.1 and 6.1.2 of Parts A and B of Annex I;
 - (b) the values for a_{2021} , a_{2025} and a_{2030} calculated by the Commission in accordance with point 6.2 of Parts A and B of Annex I.

Article 10

Derogations for certain manufacturers

1. An application for a derogation from the specific emissions target calculated in accordance with Annex I may be made by a manufacturer of fewer than 10 000 new passenger cars or 22 000 new light commercial vehicles registered in the Union per calendar year, and which:
 - (a) is not part of a group of connected manufacturers; or
 - (b) is part of a group of connected manufacturers that is responsible in total for fewer than 10 000 new passenger cars or 22 000 new light commercial vehicles registered in the Union per calendar year; or
 - (c) is part of a group of connected manufacturers but operates its own production facilities and design centre.

2. A derogation applied for under paragraph 1 may be granted for a maximum period of five calendar years, which is renewable. An application shall be made to the Commission and shall include:
- (a) the name of, and contact person for, the manufacturer;
 - (b) evidence that the manufacturer is eligible for a derogation under paragraph 1;
 - (c) details of the passenger cars or light commercial vehicles which it manufactures including the test mass and specific emissions of CO₂ of those passenger cars or light commercial vehicles; and
 - (d) a specific emissions target consistent with its reduction potential, including the economic and technological potential to reduce its specific emissions of CO₂ and taking into account the characteristics of the market for the type of passenger car or light commercial vehicle manufactured.
3. Where the Commission considers that the manufacturer is eligible for a derogation applied for under paragraph 1 and is satisfied that the specific emissions target proposed by the manufacturer is consistent with its reduction potential, including the economic and technological potential to reduce its specific emissions of CO₂, and taking into account the characteristics of the market for the type of passenger car or light commercial vehicle manufactured, the Commission shall grant a derogation to the manufacturer. The application shall be submitted at the latest by 31 October of the first year in which the derogation shall apply.
4. An application for a derogation from the specific emissions target calculated in accordance with points 1 to 4 of Part A of Annex I may be made by a manufacturer which is responsible, together with all of its connected undertakings, for between 10 000 and 300 000 new passenger cars registered in the Union per calendar year.
- Such application may be made by a manufacturer in respect of itself or in respect of itself together with any of its connected undertakings. An application shall be made to the Commission and shall include:

- (a) all of the information referred to in paragraphs 2(a) and (c) including, where relevant, information about any connected undertakings;
- (b) a target which is a 45 % reduction on the average specific emissions of CO₂ in 2007 or, where a single application is made in respect of a number of connected undertakings, a 45 % reduction on the average of those undertakings' average specific emissions of CO₂ in 2007.

Where information on a manufacturer's average specific emissions of CO₂ does not exist for the year 2007, the Commission shall determine an equivalent reduction target based upon the best available CO₂ emissions reduction technologies deployed in passenger cars of comparable mass and taking into account the characteristics of the market for the type of car manufactured. This target shall be used by the applicant for the purposes of point (b).

The Commission shall grant a derogation to the manufacturer where it is demonstrated that the criteria for the derogation referred to in this paragraph have been met.

- 5. A manufacturer which is subject to a derogation in accordance with this Article shall notify the Commission immediately of any change which affects or may affect its eligibility for a derogation.
- 6. Where the Commission considers, whether on the basis of a notification under paragraph 5 or otherwise, that a manufacturer is no longer eligible for the derogation, it shall revoke the derogation with effect from 1 January of the next calendar year and shall notify the manufacturer thereof.
- 7. Where the manufacturer does not attain its specific emissions target, the Commission shall impose the excess emissions premium on the manufacturer, as set out in Article 8.
- 8. The Commission shall be empowered to adopt delegated acts in accordance with Article 16 laying down rules to supplement paragraphs 1 to 7 of this Article, as regards the interpretation of the eligibility criteria for derogations, the content of the applications, and the content and assessment of programmes for the reduction of specific emissions of CO₂.

9. Applications for a derogation, including the information supporting it, notifications under paragraph 5, revocations under paragraph 6 and any imposition of an excess emissions premium under paragraph 7 and measures adopted pursuant to paragraph 8, shall be made publicly available, subject to Regulation (EC) No 1049/2001 of the European Parliament and of the Council²⁰.

Article 11

Eco-innovation

1. Upon application by a supplier or a manufacturer, CO₂ savings achieved through the use of innovative technologies or a combination of innovative technologies ('innovative technology packages') shall be considered.

Such technologies shall be taken into consideration only if the methodology used to assess them is capable of producing verifiable, repeatable and comparable results.

The total contribution of those technologies to reducing the average specific emissions of a manufacturer may be up to 7 g CO₂/km.

The Commission may adjust the cap with effect from 2025 onwards to take into account technological developments. Those adjustments shall be performed by means of delegated acts in accordance with Article 16.

2. The Commission shall adopt, by means of implementing acts, detailed provisions for a procedure to approve the innovative technologies or innovative technology packages referred to in paragraph 1. Those implementing acts shall be adopted in accordance with the examination procedure referred to in Article 15(2) of this Regulation. Those detailed provisions shall be based on the following criteria for innovative technologies:

²⁰ Regulation (EC) No 1049/2001 of the European Parliament and of the Council of 30 May 2001 regarding public access to European Parliament, Council and Commission documents (OJ L 145, 31.5.2001, p. 43).

- (a) the supplier or manufacturer must be accountable for the CO₂ savings achieved through the use of the innovative technologies;
 - (b) the innovative technologies must make a verified contribution to CO₂ reduction;
 - (c) the innovative technologies must not be covered by the standard test cycle CO₂ measurement;
 - (d) the innovative technologies must not be covered by mandatory provisions due to complementary additional measures complying with the 10 g CO₂/km reduction referred to in Article 1 or be mandatory under other provisions of Union law. With effect from 1 January 2025, this criterion shall not apply with regard to efficiency improvements for air conditioning systems.
3. A supplier or a manufacturer who applies for a measure to be approved as an innovative technology or innovative technology package shall submit a report, including a verification report undertaken by an independent and certified body, to the Commission. In the event of a possible interaction of the measure with another innovative technology or innovative technology package already approved, the report shall mention that interaction and the verification report shall evaluate to what extent that interaction modifies the reduction achieved by each measure.
4. The Commission shall attest the reduction achieved on the basis of the criteria set out in paragraph 2.

Article 12

Real world CO₂ emissions and energy consumption

1. The Commission shall monitor and assess the real world representativeness of the CO₂ emission and energy consumption values determined [...] pursuant to Regulation (EC) No 715/2007. It shall ensure that the public is informed of how that representativeness evolves over time.
2. For that purpose, the Commission shall ensure [...] that the following parameters relating to real world CO₂ emissions and energy consumption of passenger cars and light commercial vehicles are made available at regular intervals to the Commission, starting from 1 January 2021, from manufacturers, national authorities or through direct data transfer from vehicles, as the case may be:
 - (a) vehicle identification number;
 - (b) fuel and/or electric energy consumed;
 - (c) total distance travelled;
 - (d) for externally chargeable hybrid electric vehicles, the fuel and electric energy consumed and the distance travelled distributed over the different driving modes.

The Commission shall process the data received to create an anonymised and aggregated dataset for the purposes of paragraph 1. The vehicle identification numbers shall be used only for the purpose of the data processing and shall not be retained longer than needed for that purpose.

3. The Commission [...] shall adopt the [...] detailed procedure for collecting and processing the data referred to in [...] paragraph 2 by means of implementing acts in accordance with the examination procedure referred to in Article 15(2).

Article 13

Adjustment of M_0 and TM_0

1. The figures M_0 and TM_0 referred to in Parts A and B of Annex I shall be adjusted as follows:
 - (a) by 31 October 2020, the figure M_0 in points 1 to 5 of Part A of Annex I shall be adjusted to the average mass in running order of new passenger cars in the previous three calendar years 2017, 2018, and 2019. That new M_0 value shall apply from 1 January 2022 until 31 December 2024;
 - (b) by 31 October 2022, the figure M_0 in points 1 to 5 of Part B of Annex I shall be adjusted to the average mass in running order of new light commercial vehicles in the previous three calendar years 2019, 2020 and 2021. That new M_0 shall apply in 2024;
 - (c) by 31 October 2022, the indicative TM_0 for 2025 shall be determined as the respective average test mass of new passenger cars and new light commercial vehicles in 2021;
 - (d) by 31 October 2024, and every second year thereafter, the figures TM_0 in Parts A and B of Annex I shall be adjusted to the respective average test mass of new passenger cars and new light commercial vehicles in the preceding two calendar years starting with 2022 and 2023. The new respective TM_0 shall apply from 1 January of the calendar year following the date of the adjustment.
2. The Commission shall, by means of delegated acts, adopt the measures referred to in paragraph 1 in accordance with Article 16.

Article 14

Review and report

1. The Commission shall in 2024 review [...] the effectiveness of this Regulation [...], including the functioning of the incentive mechanism for zero- and low-emission vehicles and other aspects of this Regulation and [...] submit a report to the European Parliament and to the Council with the result of this review.
- 1a. In [...] the report referred to in paragraph 1 [...] the Commission shall consider, inter alia, the real world representativeness of the CO₂ emission and energy consumption values determined [...] pursuant to Regulation (EC) No 715/2007, the deployment on the Union market of zero- and low-emission vehicles and the roll-out of recharging and refuelling infrastructure reported under Directive 2014/94/EU of the European Parliament and of the Council²¹, including their financing, [...] as well as aspects to further facilitate an economically viable and socially fair transition towards clean, competitive and affordable mobility in the Union. The Commission shall also identify a clear pathway for further CO₂ emission reductions for passenger cars and light commercial vehicles beyond 2030 in order to significantly [...] contribute to achieving the long-term goal of the Paris Agreement.
- 1b. The report referred to in paragraph 1 shall, where appropriate, be accompanied by a proposal for amending this Regulation, in particular by the possible introduction of emission reduction targets for 2040 onwards for passenger cars and light-duty vehicles.
2. The Commission shall take into account the assessments performed pursuant to Article 12 and may, where appropriate, review the procedures for measuring CO₂ emissions as set out under Regulation (EC) No 715/2007. The Commission shall, in particular, make appropriate proposals to adapt those procedures to reflect adequately the real world CO₂ emissions of cars and light commercial vehicles.

²¹ Directive 2014/94/EU of the European Parliament and of the Council of 22 October 2014 on the deployment of alternative fuels infrastructure (OJ L 307, 28.10.2014, p. 1)

3. The Commission shall, by means of implementing acts, determine the correlation parameters necessary in order to reflect any change in the regulatory test procedure for the measurement of specific CO₂ emissions referred to in Regulation (EC) No 715/2007 and Regulation (EC) No 692/2008 and, where applicable, Regulation (EU) 2017/1151. Those implementing acts shall be adopted in accordance with the examination procedure referred to in Article 15(2) of this Regulation.
- 3a. The Commission shall be empowered to adopt delegated acts in accordance with Article 16 in order to adapt the formulae set out in Annex I, using the methodology adopted pursuant to [...] paragraph 3 of this Article, while ensuring that reduction requirements of comparable stringency for manufacturers and vehicles of different utility are required under the old and new test procedures.

Article 15

Committee procedure

1. The Commission shall be assisted by the [...] Climate Change Committee established by [Article 37] of [Regulation (EU) [...]] of the European Parliament and of the Council²². That committee shall be a committee within the meaning of Regulation (EU) No 182/2011 of the European Parliament and of the Council²³.
2. Where reference is made to this paragraph, Article 5 of Regulation (EU) No 182/2011 shall apply.
3. Where the Committee delivers no opinion, the Commission shall not adopt the draft implementing act and the third subparagraph of Article 5(4) of Regulation (EU) No 182/2011 shall apply.

²² Regulation (EU) [...] of the European Parliament and the Council on the Governance of the Energy union (OJ L,...).

²³ Regulation (EU) No 182/2011 of the European Parliament and of the Council of 16 February 2011 laying down the rules and general principles concerning mechanisms for control by Member States of the Commission's exercise of implementing powers (OJ L 55, 28.2.2011, p. 13).

Article 16

Exercise of the delegation

1. The power to adopt delegated acts referred to in [...] Article 7(7a), Article 10(8), the fourth subparagraph of Article 11(1), Article 13(2) and [...] Article 14(3a) shall be conferred on the Commission for [...] **a period of six years** from [the date of entry into force of this Regulation]. **The Commission shall draw up a report in respect of the delegation of power not later than nine months before the end of the six-year period. The delegation of power shall be tacitly extended for periods of an identical duration, unless the European Parliament or the Council opposes such extension not later than three months before the end of each period.**
2. The delegation of power referred to in [...] Article 7(7a), Article 10(8), the fourth subparagraph of Article 11(1), Article 13(2) and [...] Article 14(3a) may be revoked at any time by the European Parliament or by the Council. A decision to revoke shall put an end to the delegation of the power specified in that decision. It shall take effect the day following the publication of the decision in the *Official Journal of the European Union* or at a later date specified therein. It shall not affect the validity of any delegated acts already in force.

3. As soon as it adopts a delegated act, the Commission shall notify it simultaneously to the European Parliament and to the Council.
4. A delegated act adopted pursuant to [...] Article 7(7a), Article 10(8), the fourth subparagraph of Article 11(1), Article 13(2) and the [...] Article 14(3a) shall enter into force only if no objection has been expressed either by the European Parliament or by the Council within a period of two months of notification of that act to the European Parliament and the Council or if, before the expiry of that period, the European Parliament and the Council have both informed the Commission that they will not object. That period shall be extended by two months at the initiative of the European Parliament or of the Council.

Article 17

Amendment to Regulation (EC) No 715/2007

The following Article 11a shall be inserted in Regulation (EC) No 715/2007:

"Article 11a

In-service conformity of CO₂ emissions and fuel consumption

1. Subject to the adoption and entry into force of the procedures referred to in paragraph 2, type approval authorities shall, on the basis of appropriate and representative samples, verify that vehicles that have entered into service and for which they granted type approval conform to the CO₂ emission and fuel consumption values recorded in the certificates of conformity.
2. The Commission shall adopt implementing acts in accordance with Article 15 (2) in order to determine the procedures for verifying the in-service conformity of light duty vehicles in respect of the certified CO₂ and fuel consumption values."

Article 18

Repeal

Regulations (EC) No 443/2009 and (EU) No 510/2011 are repealed with effect from 1 January 2020.

References to the repealed Regulations shall be construed as references to this Regulation and shall be read in accordance with the correlation table in Annex V.

Article 19

Entry into force

This Regulation shall enter into force on the twentieth day following that of its publication in the *Official Journal of the European Union*.

It shall apply from 1 January 2020.

This Regulation shall be binding in its entirety and directly applicable in all Member States.

Done at Brussels,

For the European Parliament
The President

For the Council
The President

ANNEX I

PART A. SPECIFIC EMISSIONS TARGETS FOR PASSENGER CARS

1. For the calendar year 2020 the specific emissions of CO₂ for each new passenger car, shall, be determined in accordance with the following formula:

$$\text{Specific emission of CO}_2 = 95 + a \cdot (M - M_0)$$

Where:

M	=	Mass in running order of the vehicle in kilograms (kg)
M ₀	=	1 379.88
a	=	0.0333

2. The specific emissions target for a manufacturer in 2020 shall be calculated as the average of the specific emissions of CO₂ of each new passenger car registered in that calendar year of which it is the manufacturer.

3. The specific emission reference target for a manufacturer in 2021 shall be calculated as follows:

$$\text{WLTP specific emission reference target} = \text{WLTP}_{\text{CO}_2} \cdot \left(\frac{\text{NEDC}_{2020\text{target}}}{\text{NEDC}_{\text{CO}_2}} \right)$$

Where:

WLTP _{CO2}	is the average specific emissions of CO ₂ in 2020 determined in accordance with Annex XXI to Commission Regulation (EU) 2017/1151 ²⁴ and calculated in accordance with the second indent Article 4(3) of this Regulation, without including CO ₂ savings resulting from the application of Articles 5 and 11 of this Regulation;
NEDC _{CO2}	is the average specific emissions of CO ₂ in 2020 determined in accordance with Commission Implementing Regulation (EU) 2017/1153 ²⁵ and calculated in accordance with the second indent of Article 4(3) of this Regulation, without including CO ₂ savings resulting from the application of Articles 5 and 11 of this Regulation
NEDC _{2020target}	is the 2020 specific emissions target calculated in accordance with points 1 and 2 of this Annex.

4. For the calendar years 2021 to 2024, the specific emissions target for a manufacturer shall be calculated as follows:

$$\text{Specific emissions target} = \text{WLTP}_{\text{reference target}} + a [(M_{\emptyset} - M_0) - (M_{\emptyset 2020} - M_{0,2020})]$$

²⁴ Commission Regulation (EU) 2017/1151 of 1 June 2017 supplementing Regulation (EC) No 715/2007 of the European Parliament and of the Council on type-approval of motor vehicles with respect to emissions from light passenger and commercial vehicles (Euro 5 and Euro 6) and on access to vehicle repair and maintenance information, amending Directive 2007/46/EC of the European Parliament and of the Council, Commission Regulation (EC) No 692/2008 and Commission Regulation (EU) No 1230/2012 and repealing Regulation (EC) No 692/2008 (OJ L 175, 7.7.2017, p. 1).

²⁵ Commission Implementing Regulation (EU) 2017/1152 of 2 June 2017 setting out a methodology for determining the correlation parameters necessary for reflecting the change in the regulatory test procedure with regard to light commercial vehicles and amending Implementing Regulation (EU) No 293/2012 (OJ L 175, 7.7.2017, p. 644).

Where:

WLTP_{reference target} is the 2021 WLTP specific emission reference target calculated in accordance with point 3;

a is 0.0333;

M₀ is the average of the mass in running order (M) of the new registered vehicles in the target year in kilograms (kg);

M₀ is 1379.88 in 2021, and as defined in Article 13(1)(a) for the period 2022, 2023 and 2024;

M_{0,2020} is the average of the mass in running order (M) of the new registered vehicles in 2020 in kilograms (kg);

M_{0,2020} is 1379.88

5. For a manufacturer that has been granted a derogation with regard to a specific NEDC based emissions target in 2021, the WLTP based derogation target shall be calculated as follows:

$$\text{Derogation target}_{2021} = \text{WLTP}_{\text{CO}_2} \cdot \left(\frac{\text{NEDC}_{2021\text{target}}}{\text{NEDC}_{\text{CO}_2}} \right)$$

Where:

WLTP_{CO2} is as defined in point 3;

NEDC_{CO2} is as defined in point 3;

NEDC_{2021target} is the 2021 specific emissions target granted by the Commission pursuant to Article 10 of this Regulation.

6. From 1 January 2025, the EU fleet-wide targets and the specific emissions targets of CO₂ for a manufacturer shall be calculated as follows:

6.0. EU fleet-wide target₂₀₂₁

EU fleet-wide target₂₀₂₁ is the average, weighted by the number of newly registered cars, of the reference-values₂₀₂₁ determined for each individual manufacturer for which a specific emissions target applies in accordance with point 4.

The reference-value₂₀₂₁ shall be determined, for each manufacturer, as follows:

$$\text{reference-value}_{2021} = \text{WLTP}_{\text{CO}_2, \text{measured}} \cdot \left(\frac{\text{NEDC}_{2020 \text{target}}}{\text{NEDC}_{\text{CO}_2}} \right) + a [(M_{\emptyset 2021} - M_0) - (M_{\emptyset 2020} - M_{0,2020})]$$

Where,

WLTP_{CO₂,measured} is the average, for each manufacturer, of the measured CO₂ emissions combined of each new passenger car registered in 2020 as determined and reported in accordance with Article 7(a)(1)(b) of Implementing Regulation (EU) 2017/1153;

NEDC_{2020target} and NEDC_{CO₂} are as defined in point 3;

M_{∅2021} is the average of the mass in running order of the new registered passenger cars of the manufacturer in 2021 in kilograms (kg);

M₀ is 1379.88²⁶

a, M_{∅2020}, M_{0,2020} are as defined in point 4.

6.1. EU fleet-wide targets for 2025 and 2030

6.1.1. EU fleet-wide target for 2025 to 2029

$$\text{EU fleet-wide target}_{2025} = \text{EU fleet-wide target}_{2021} \cdot (1 - \text{reduction factor}_{2025})$$

Where,

EU fleet-wide target₂₀₂₁ [...] as defined in point 6.0.

Reduction factor₂₀₂₅ is the reduction specified in Article 1(4)(a)

²⁶ also as set out in point 4.

6.1.2. EU fleet-wide target for 2030 onwards

EU fleet-wide target₂₀₃₀ = EU fleet-wide target₂₀₂₁ · (1 - reduction factor₂₀₃₀)

Where,

EU fleet-wide target₂₀₂₁ [...] as defined in point 6.0.

Reduction factor₂₀₃₀ is the reduction specified in Article 1(5)(a)

6.2. Specific emissions reference targets from 2025 onwards

6.2.1. 2025 to 2029

The specific emissions reference target = EU fleet-wide target₂₀₂₅ + a₂₀₂₅ · (TM-TM₀)

Where,

EU fleet-wide target₂₀₂₅ is as determined in accordance with point 6.1.1

a₂₀₂₅ is $\frac{a_{2021} \cdot \text{EU fleet-wide target}_{2025}}{\text{Average emissions}_{2021}}$

where,

a₂₀₂₁ is the slope of the best fitting straight line established by applying the linear least squares fitting method to the test mass (explanatory variable) and the specific CO₂ emissions (dependent variable) of each individual vehicle in the 2021 EU fleet

average emissions₂₀₂₁ is the average of the specific emissions of CO₂ of all newly registered vehicles in 2021 of those manufacturers for which a specific emissions target is calculated in accordance with point 4

TM is the average test mass in kilograms of all newly registered vehicles of the manufacturer in the relevant calendar year

TM₀ is the value determined in accordance with Article 13(1)(d)

6.2.2. 2030 onwards

The specific emissions reference target = EU fleet-wide target₂₀₃₀ + a₂₀₃₀ · (TM-TM₀)

Where,

EU fleet-wide target₂₀₃₀ is as determined in accordance with point 6.1.2

a₂₀₃₀ is $\frac{a_{2021} \cdot \text{EU fleet-wide target}_{2030}}{\text{Average emissions}_{2021}}$

where,

a₂₀₂₁ is the slope of the best fitting straight line established by applying the linear least squares fitting method to the test mass (explanatory variable) and the specific CO₂ emissions (dependent variable) of each individual vehicle in the 2021 EU fleet

average emissions₂₀₂₁ is the average of the specific emissions of CO₂ of all newly registered vehicles in 2021 of those manufacturers for which a specific emissions target is calculated in accordance with point 4

TM is the average test mass in kilograms of all newly registered vehicles of the manufacturer in the relevant calendar year

TM₀ is the value determined in accordance with Article 13(1)(d)

6.3. The specific emissions target from 2025 onwards

Specific emissions target = specific emissions reference target · ZLEV factor

Where,

Specific emissions reference target is the specific emissions reference target of CO₂ determined in accordance with point 6.2.1 for the period 2025 to 2029 and 6.2.2 for 2030 onwards

ZLEV factor is (1+y-x), unless this sum is larger than 1.05 or lower than 1.0 in which case the ZLEV factor shall be set to 1.05 or 1.0 as the case may be

Where,

y is the share of zero- and low-emission vehicles in the manufacturer's fleet of newly registered passenger cars calculated as the total number of zero- and low-emission vehicles, where each of them is counted as $ZLEV_{specific}$ in accordance with the formula below, divided by the total number of passenger cars registered in the relevant calendar year

$$ZLEV_{specific} = 1 - \left(\frac{specific\ emissions \cdot 0,5}{50} \right)$$

x is 15% in the years 2025 to 2029 and [...] [35] % [...] from 2030 onwards.

PART B. SPECIFIC CO₂ EMISSIONS TARGETS FOR LIGHT COMMERCIAL VEHICLES

1. In 2020 the specific emissions of CO₂ for each light commercial vehicle, shall be determined in accordance with the following formula:

$$\text{Specific emissions of CO}_2 = 147 + a \cdot (M - M_0)$$

where:

M	=	mass in running order of the vehicle in kilograms (kg)
M ₀	=	1 766.4
a	=	0.096.

2. The specific emissions target for a manufacturer in 2020 shall be calculated as the average of the specific emissions of CO₂ of each new light commercial vehicle registered in that calendar year of which it is the manufacturer.

3. The specific emission reference target for a manufacturer in 2021 shall be calculated as follows:

$$\text{WLTP specific emission reference target} = \text{WLTP}_{\text{CO}_2} \cdot \left(\frac{\text{NEDC}_{2020\text{target}}}{\text{NEDC}_{\text{CO}_2}} \right)$$

Where:

WLTP_{CO₂} is the average specific emissions of CO₂ in 2020 determined in accordance with Annex XXI to Commission Regulation (EU) 2017/1151 without including CO₂ savings resulting from the application of Article 11 of this Regulation;

NEDC_{CO₂} is the average specific emissions of CO₂ in 2020 determined in accordance with Implementing Regulation (EU) 2017/1152, without including CO₂ savings resulting from the application of Article 11 of this Regulation;

NEDC_{2020target} is the 2020 specific emissions target calculated in accordance with point 1 and 2 of this Annex.

4. For the calendar years 2021 to 2024, the specific emissions target for a manufacturer shall be calculated as follows:

$$\text{Specific emissions target} = \text{WLTP}_{\text{reference target}} + a [(M_{\theta} - M_0) - (M_{\theta 2020} - M_{0,2020})]$$

Where:

$\text{WLTP}_{\text{reference target}}$ is the 2021 WLTP specific emission reference target calculated in accordance with point 3;

a is 0.096;

M_{θ} is the average of the mass in running order (M) of the new registered light commercial vehicles in the relevant target year in kilograms (kg);

M_0 is 1 766.4 in 2020 and, for the period 2021, 2022 and 2023, the value adopted pursuant to Article 13(5) of Regulation (EU) No 510/2011, and for 2024 the value adopted pursuant to Article 13(1)(b) of this Regulation;

$M_{\theta 2020}$ is the average of the mass in running order (M) of the new registered light commercial vehicles in 2020 in kilograms (kg);

$M_{0,2020}$ is 1 766.4.

5. For a manufacturer that has been granted a derogation with regard to a specific NEDC based emissions target in 2021, the WLTP based derogation target shall be calculated as follows:

$$\text{Derogation target}_{2021} = \text{WLTP}_{\text{CO}_2} \cdot \left(\frac{\text{NEDC}_{2021\text{target}}}{\text{NEDC}_{\text{CO}_2}} \right)$$

Where:

$\text{WLTP}_{\text{CO}_2}$ is $\text{WLTP}_{\text{CO}_2}$ as defined in point 3;

$\text{NEDC}_{\text{CO}_2}$ is $\text{NEDC}_{\text{CO}_2}$ as defined in point 3;

$\text{NEDC}_{2021\text{target}}$ is the 2021 specific emissions target granted by the Commission pursuant to Article 10 of this Regulation.

6. From 1 January 2025, the EU fleet-wide targets and the specific emissions target of CO₂ for a manufacturer shall be calculated as follows:

6.0. EU fleet-wide target₂₀₂₁

The EU fleet-wide target₂₀₂₁ is the average, weighted by the number of newly registered light commercial vehicles, of the reference-values₂₀₂₁ determined for each individual manufacturer for which a specific emissions target applies in accordance with point 4.

The reference-value₂₀₂₁ shall be determined, for each manufacturer, as follows:

reference-value₂₀₂₁ = WLTP_{CO₂,measured} ·

$$\left(\frac{NEDC_{2020target}}{NEDC_{CO_2}} \right) + a [(M_{\emptyset 2021} - M_0) - (M_{\emptyset 2020} - M_{0,2020})]$$

Where,

WLTP_{CO₂,measured} is the average, for each manufacturer, of the measured CO₂ emissions combined of each new light commercial vehicle registered in 2020 as determined and reported in accordance with Article 7(a)(1)(b) of Implementing Regulation (EU) 2017/1152;

NEDC_{2020target} and NEDC_{CO₂} are as defined in point 3;

M_{∅2021} is the average of the mass in running order of the new registered light commercial vehicles of the manufacturer in 2021 in kilograms (kg);

M₀ is the value M₀ as defined in point 4 for the year 2021;

a, M_{∅2020}, M_{0,2020} are as defined in point 4.

6.1. The EU fleet-wide targets for 2025 and 2030

6.1.1. EU fleet-wide target for 2025 to 2029

$$\text{EU fleet-wide target}_{2025} = \text{EU fleet-wide target}_{2021} \cdot (1 - \text{reduction factor}_{2025})$$

Where,

EU fleet-wide target₂₀₂₁ [...] as defined in point 6.0.

Reduction factor₂₀₂₅ is the reduction specified in Article 1(4)(b)

6.1.2. EU fleet-wide target for 2030 onwards

$$\text{EU fleet-wide target}_{2030} = \text{EU fleet-wide target}_{2021} \cdot (1 - \text{reduction factor}_{2030})$$

Where,

EU fleet-wide target₂₀₂₁ [...] as defined in point 6.0.

Reduction factor₂₀₃₀ is the reduction specified in Article 1(5)(b)

6.2. The specific emissions reference target from 2025 onwards

6.2.1. 2025 to 2029

The specific emissions reference target = EU fleet-wide target₂₀₂₅ + α · (TM-TM₀)

Where,

EU fleet-wide target₂₀₂₅

is as determined in accordance with point 6.1.1

α

is a_{2025} where the average test mass of a manufacturer's newly registered vehicles is equal to or lower than TM₀ determined in accordance with Article 13(1)(d) and a_{2021} where the average test mass of a manufacturer's newly registered vehicles is higher than TM₀ determined in accordance with Article 13(1)(d),

where,

a_{2025}

is $\frac{a_{2021} \cdot \text{EU fleet-wide target}_{2025}}{\text{Average emissions}_{2021}}$

a_{2021}

is the slope of the best fitting straight line established by applying the linear least squares fitting method to the test mass (explanatory variable) and the specific CO₂ emissions (dependent variable) of each newly registered vehicle in the 2021 EU fleet

average emissions₂₀₂₁

is the average of the specific emissions of CO₂ of all newly registered vehicles in 2021 of those manufacturers for which a specific emissions target is calculated in accordance with point 4

TM

is the average test mass in kilograms of all newly registered vehicles of the manufacturer in the relevant calendar year

TM₀

is the value determined in accordance with Article 13(1)(d)

6.2.2. 2030 onwards

The specific emissions reference target = EU fleet-wide target₂₀₃₀ + α · (TM-TM₀)

Where,

EU fleet-wide target₂₀₃₀

is as determined in accordance with point 6.1.2

α

is a_{2030} where the average test mass of a manufacturer's newly registered vehicles is equal to or lower than TM₀ determined in accordance with Article 13(1)(d) and a_{2021} where the average test mass of a manufacturer's newly registered vehicles is higher than TM₀ determined in accordance with Article 13(1)(d),

where,

a_{2030}

is $\frac{a_{2021} \cdot \text{EU fleet-wide target}_{2030}}{\text{Average emissions}_{2021}}$

a_{2021}

is the slope of the best fitting straight line established by applying the linear least squares fitting method to the test mass (explanatory variable) and the specific CO₂ emissions (dependent variable) of each newly registered vehicle in the 2021 EU fleet

average emissions₂₀₂₁

is the average of the specific emissions of CO₂ of all newly registered vehicles in 2021 of those manufacturers for which a specific emissions target is calculated in accordance with point 4

TM

is the average test mass in kilograms of all newly registered vehicles of the manufacturer in the relevant calendar year

TM₀

is the value determined in accordance with Article 13(1)(d)

6.3. Specific emissions targets from 2025 onwards

6.3.1. From 2025 to 2029

The specific emissions target = (specific emissions reference target – ($\emptyset_{\text{targets}}$ – EU fleet-wide target₂₀₂₅)) · ZLEV factor

Where,

Specific emissions reference target is the specific emissions reference target for the manufacturer determined in accordance with point 6.2.1

$\emptyset_{\text{targets}}$ is the average, weighted on the number of newly registered light commercial vehicles of each individual manufacturer, of all the specific emissions reference targets determined in accordance with point 6.2.1

ZLEV factor is (1+y-x), unless this sum is larger than 1.05 or lower than 1.0 in which case the ZLEV factor shall be set to 1.05 or 1.0 as the case may be

Where,

y is the share of zero- and low-emission vehicles in the manufacturer's fleet of newly registered light commercial vehicles calculated as the total number of zero- and low-emission vehicles, where each of them is counted as $ZLEV_{\text{specific}}$ in accordance with the formula below, divided by the total number of light commercial vehicles registered in the relevant calendar year

$$ZLEV_{\text{specific}} = 1 - \left(\frac{\text{specific emissions}}{50} \right)$$

x is 15%

6.3.2. From 2030 onwards

The specific emissions target = (specific emissions reference target – ($\emptyset_{\text{targets}}$ – EU fleet-wide target₂₀₃₀)) · ZLEV factor

Where,

Specific emissions reference target is the specific emissions reference target for the manufacturer determined in accordance with point 6.2.2

$\emptyset_{\text{targets}}$ is the average, weighted on the number of newly registered light commercial vehicles of each individual manufacturer, of all the specific emissions reference targets determined in accordance with point 6.2.2

ZLEV factor is (1+y-x), unless this sum is larger than 1.05 or lower than 1.0 in which case the ZLEV factor shall be set to 1.05 or 1.0 as the case may be

Where,

y is the share of zero- and low-emission vehicles in the manufacturer's fleet of newly registered light commercial vehicles calculated as the total number of zero- and low-emission vehicles, where each of them is counted as $ZLEV_{\text{specific}}$ in accordance with the formula below, divided by the total number of light commercial vehicles registered in the relevant calendar year

$$ZLEV_{\text{specific}} = 1 - \left(\frac{\text{specific emissions}}{50} \right)$$

x is 30%

ANNEX II

MONITORING AND REPORTING EMISSIONS FROM NEW PASSENGER CARS

PART A — Collection of data on new passenger cars and determination of CO₂ monitoring information

1. Member States shall, for each calendar year, record the following detailed data for each new passenger car registered as an M1 vehicle in their territory:

- (a) the manufacturer;
- (b) the type-approval number with its extension;
- (c) the type, variant, and version (where applicable);
- (d) make and commercial name;
- (e) category of vehicle type-approved;
- (f) total number of new registrations;
- (g) mass in running order;
- (h) the specific emissions of CO₂ (NEDC and WLTP);
- (i) footprint: the wheel base, the track width steering axle and the track width other axle;
- (j) the fuel type and fuel mode;
- (k) engine capacity;
- (l) electric energy consumption;
- (m) code for the innovative technology or group of innovative technologies and the CO₂ emissions reduction due to that technology (NEDC and WLTP);
- (n) maximum net power;
- (o) vehicle identification number;
- (p) WLTP test mass;
- (q) deviation and verification factors referred to in point 3.2.8 of Annex I to Implementing Regulation (EU) 2017/1153;
- (r) category of vehicle registered;
- (s) vehicle family identification number;
- (t) electric range, where applicable.

Member States shall make available to the Commission, in accordance with Article 7 all parameters listed in this point as specified in the format in Section 2 of Part B.

2. The detailed data referred to in point 1 shall be taken from the certificate of conformity of the relevant passenger car. In the case of bi-fuelled vehicles (petrol/gas), the certificates of conformity of which bear specific CO₂ emissions figures for both types of fuel, Member States shall use only the figure measured for gas.
3. Member States shall, for each calendar year, determine:
 - (a) the total number of new registrations of new passenger cars subject to EC type-approval;
 - (b) the total number of new registrations of new individually approved passenger cars;
 - (c) the total number of new registrations of new passenger cars approved nationally in small series.

PART B — Format for the transmission of data

For each year, Member States shall report the information specified in points 1 and 3 of Part A in the following formats:

Section 1 - Aggregated monitoring data

Member State ²⁷	
Year	
Total number of new registrations of new passenger cars subject to EC type-approval	
Total number of new registrations of new individually approved passenger cars	
Total number of new registrations of new passenger cars approved nationally in small series	

²⁷ ISO 3166 alpha-2 codes with the exception of Greece and the United Kingdom for which the codes are 'EL' and 'UK' respectively.

Section 2 – Detailed monitoring data – one vehicle record

Reference to Point 1 of Part A	Detailed data per vehicle registered
(a)	Manufacturer name EU standard denomination
	Manufacturer name OEM declaration
	Manufacturer name in Member State registry ¹
(b)	Type approval number and its extension
(c)	Type
	Variant
	Version
(d)	Make and commercial name
(e)	Category of vehicle type approved
(f)	Total number of new registrations
(g)	Mass in running order
(h)	Specific CO ₂ emissions (combined) NEDC value until 31 December 2020 except for vehicles that fall within the scope of Article 5 for which the NEDC value shall be determined until 31 December 2022 in accordance with Article 5 of Implementing Regulation (EU) 2017/1153
	Specific CO ₂ emissions (combined) WLTP value
(i)	Wheel base
	Track width steering axle (Axle 1)
	Track width other axle (Axle 2)
(j)	Fuel type
	Fuel mode
(k)	Engine capacity (cm ³)

(l)	Electric energy consumption (Wh/km)
(m)	Code of the eco-innovation(s)
	Total NEDC CO ₂ emissions savings due to the eco-innovation(s) until 2020 inclusive
	Total WLTP CO ₂ emissions savings due to the eco-innovation(s)
(n)	Maximum net power
(o)	Vehicle identification number
(p)	WLTP test mass
(q)	Deviation factor De (where available)
	Verification factor (where available)
(r)	Category of vehicle registered
(s)	Vehicle family identification number
(t)	Electric range, where applicable

Notes:

¹ In the case of the national small series approvals (NSS) or the individual approvals (IVA), the manufacturer name shall be provided in the column "Manufacturer name in Member State registry" whilst in the column "Manufacturer name EU standard denomination" either of the following shall be indicated: "AA-NSS" or "AA-IVA" as the case may be.

ANNEX III

MONITORING AND REPORTING OF EMISSIONS FROM LIGHT COMMERCIAL VEHICLES

A. Collection of data on light commercial vehicles and determination of CO₂ monitoring information

1. Detailed data

1.1. Complete vehicles registered as N₁

In the case of EC type-approved complete vehicles registered as N₁, Member States shall, for each calendar year, record the following detailed data for each new light commercial vehicle the first time that it is registered in their territory:

- (a) the manufacturer;
- (b) the type-approval number with its extension;
- (c) the type, variant, and version;
- (d) make;
- (e) category of vehicle type-approved;
- (f) category of vehicle registered;
- (g) the specific emissions of CO₂ (NEDC and WLTP) ;
- (h) mass in running order;
- (i) technically permissible maximum laden mass;
- (j) footprint: the wheel base, the track width steering axle and the track width other axle;
- (k) the fuel type and fuel mode;
- (l) engine capacity;
- (m) electric energy consumption;
- (n) code of the innovative technology or group of innovative technologies and the CO₂ emissions reduction due to that technology (NEDC and WLTP);
- (o) the vehicle identification number;
- (p) WLTP test mass;
- (q) Deviation and verification factors referred to in point 3.2.8 of Annex I to Implementing Regulation (EU) 2017/1152;

- (r) Vehicle family identification number determined in accordance with point 5.0 of Annex XXI to Regulation (EU) 2017/1151;
- (s) electric range, where applicable.

Member States shall make available to the Commission, in accordance with Article 7, all parameters listed in this point as specified in the format of Section 2 of Part C of this Annex.

1.2. Vehicles approved in a multi-stage process and registered as N₁ vehicles

In the case of multi-stage vehicles registered as N₁ vehicles, Member States shall, for each calendar year, record the following detailed data with regard to:

- (a) the base (incomplete) vehicle: the data specified in points (a), (b), (c), (d), (e), (g), (h), (i), (n) and (o) of point 1.1, or, instead of the data specified in (h) and (i), the default added mass provided as part of the type-approval information specified in point 2.17.2 of Annex I to Directive 2007/46/EC;
- (b) the base (complete) vehicle: the data specified in points (a), (b), (c), (d), (e), (g), (h), (i), (n) and (o) of point 1.1;
- (c) the completed vehicle: the data specified in points (a), (f), (g), (h), (j), (k), (l), (m) and (o) specified in point 1.1.

Where any of the data referred to in points (a) and (b) of this point cannot be provided for the base vehicle, the Member State shall provide data with regard to the completed vehicle instead.

The format set out in Section 2 of Part C shall be used for completed N₁ vehicles.

The vehicle identification number referred to in point (o) of point 1.1 shall not be made public.

- 2. The details referred to in point 1 shall be taken from the certificate of conformity. In the case of bi-fuelled vehicles (petrol/gas) the certificates of conformity of which bear specific CO₂ emission figures for both types of fuel, Member States shall use only the figure measured for gas.
- 3. Member States shall, for each calendar year, determine:
 - (a) the total number of new registrations of new light commercial vehicles subject to EC type-approval;
 - (b) the total number of new registrations of new light commercial vehicles subject to multi-stage type-approval, where available;
 - (c) the total number of new registrations of new individually approved light commercial vehicles;
 - (d) the total number of new registrations of new light commercial vehicles approved nationally in small series.

B. Methodology for determining CO₂ monitoring information for new light commercial vehicles

Monitoring information which Member States are required to determine in accordance with points 1 and 3 of Part A of this Annex shall be determined in accordance with the methodology in this Part.

1. Number of new light commercial vehicles registered

Member States shall determine the number of new light commercial vehicles registered within their territory in the respective monitoring year divided into vehicles subject to EC type-approval, individual approvals and national approvals of small series and, where available, the number of multi-stage vehicles.

2. Completed vehicles

In the case of multi-stage vehicles, the specific emissions of CO₂ of completed vehicles shall be allocated to the manufacturer of the base vehicle.

In order to ensure that the values of CO₂ emissions, fuel efficiency and mass of completed vehicles are representative, without placing an excessive burden on the manufacturer of the base vehicle, the Commission shall come forward with a specific monitoring procedure and shall where appropriate make the necessary amendments to the relevant type-approval legislation.

Notwithstanding that for the purpose of the calculation of the 2020 target in accordance with point 2 of Part B of Annex I the default added mass shall be taken from Part C of this Annex, where that mass value cannot be determined, the mass in running order of the completed vehicle may be used for the provisional calculation of the specific emissions target referred to in Article 7 (4).

Where the base vehicle is a complete vehicle, the mass in running order of that vehicle shall be used for the calculation of the specific emissions target. However, where that mass value cannot be determined, the mass in running order of the completed vehicle may be used for the provisional calculation of the specific emissions target.

C. Formats for transmission of data

For each year, Member States shall report the information specified in points 1 and 3 of Part A in the following format:

<i>Section 1 — Aggregated monitoring data</i>	
Member State ²⁸	
Year	
Total number of new registrations of new light commercial vehicles subject to EC type-approval	
Total number of new registrations of individually approved new light commercial vehicles	
Total number of new registrations of new light commercial vehicles approved as national small series	
Total number of new registrations of new light commercial vehicles subject to multi-stage type-approval (where available)	
<i>Section 2 — Detailed monitoring data — one vehicle record</i>	
Reference to Section 1.1 of Part A	Detailed data per vehicle registered ⁽¹⁾
(a)	Manufacturer name EU standard denomination ⁽²⁾
	Manufacturer name OEM declaration COMPLETE VEHICLE/BASE VEHICLE ⁽³⁾
	Manufacturer name OEM declaration COMPLETED VEHICLE ⁽³⁾
	Manufacturer name in Member State registry ⁽²⁾
(b)	Type-approval number and its extension
(c)	Type
	Variant
	Version

²⁸ ISO 3166 alpha-2 codes with the exception of Greece and the United Kingdom for which the codes are 'EL' and 'UK' respectively.

(d)	Make
(e)	Category of vehicle type-approved
(f)	Category of vehicle registered
(g)	Specific CO ₂ emissions (combined) NEDC value until 31 December 2020
	Specific CO ₂ emissions (combined) WLTP value
(h)	Mass in running order BASE VEHICLE
	Mass in running order COMPLETED VEHICLE/COMPLETE VEHICLE
(i) ⁽⁴⁾	Technically permissible maximum laden mass
(j)	Wheel base
	Axle width steering axle (Axle 1)
	Axle width other axle (Axle 2)
(k)	Fuel type
	Fuel mode
(l)	Engine capacity (cm ³)
(m)	Electric energy consumption (Wh/km)
(n)	Code of the eco-innovation(s)
	Total NEDC CO ₂ emissions savings due to the eco-innovation(s) until 31 December 2020
	Total WLTP CO ₂ emissions savings due to the eco-innovation(s)
(o)	Vehicle identification number
(p)	WLTP test mass
(q)	Deviation factor De (where available)
	Verification factor (where available)

(r)	Vehicle family identification number
(s)	electric range, where available
Point 2.17.2 of Annex I to Directive 2007/46/EC ²⁹	Default added mass (where applicable in the case of multi-stage vehicles)

Notes:

- (1) Where, in the case of multi-stage vehicles, data cannot be provided for the base vehicle, the Member State shall as a minimum provide the data specified in this format for the completed vehicle.
- (2) In the case of the national small series approvals (NSS) or the individual approvals (IVA), the manufacturer name shall be provided in the column ‘Manufacturer name in Member State registry’ whilst in the column ‘Manufacturer name EU standard denomination’ either of the following shall be indicated: ‘AA-NSS’ or ‘AA-IVA’ as the case may be.
- (3) In the case of multi-stage vehicles indicate the base (incomplete/complete) vehicle manufacturer. If the base vehicle manufacturer is not available indicate the manufacturer of the completed vehicle only.
- (4) In the case of multi-stage vehicles indicate the technically permissible maximum laden mass of the base vehicle.
- (5) In the case of multi-stage vehicles, the mass in running order and the technically permissible maximum laden mass of the base vehicle may be replaced by the default added mass specified in the type-approval information in accordance with point 2.17.2 of Annex I to Directive 2007/46/EC.

²⁹ In the case of multi-stage vehicles, the mass in running order and the technically permissible maximum laden mass of the base vehicle may be replaced by the default added mass specified in the type-approval information in accordance with point 2.17.2 of Annex I to Directive 2007/46/EC.

ANNEX IV

Repealed Regulations with lists of their successive amendments
