Conformément au règlement (CEE, Euratom) n° 354/83 du Conseil du 1er février 1983 concernant l'ouverture au public des archives historiques de la Communauté économique européenne et de la Communauté européenne de l'énergie atomique (JO L 43 du 15.2.1983, p. 1), tel que modifié par le règlement (CE, Euratom) n° 1700/2003 du 22 septembre 2003 (JO L 243 du 27.9.2003, p. 1), ce dossier est ouvert au public. Le cas échéant, les documents classifiés présents dans ce dossier ont été déclassifiés conformément à l'article 5 dudit règlement.

In accordance with Council Regulation (EEC, Euratom) No 354/83 of 1 February 1983 concerning the opening to the public of the historical archives of the European Economic Community and the European Atomic Energy Community (OJ L 43, 15.2.1983, p. 1), as amended by Regulation (EC, Euratom) No 1700/2003 of 22 September 2003 (OJ L 243, 27.9.2003, p. 1), this file is open to the public. Where necessary, classified documents in this file have been declassified in conformity with Article 5 of the aforementioned regulation.

In Übereinstimmung mit der Verordnung (EWG, Euratom) Nr. 354/83 des Rates vom 1. Februar 1983 über die Freigabe der historischen Archive der Europäischen Wirtschaftsgemeinschaft und der Europäischen Atomgemeinschaft (ABl. L 43 vom 15.2.1983, S. 1), geändert durch die Verordnung (EG, Euratom) Nr. 1700/2003 vom 22. September 2003 (ABl. L 243 vom 27.9.2003, S. 1), ist diese Datei der Öffentlichkeit zugänglich. Soweit erforderlich, wurden die Verschlussachen in dieser Datei in Übereinstimmung mit Artikel 5 der genannten Verordnung freigegeben.

COMMISSION OF THE EUROPEAN COMMUNITIES

COM(85) 644 final

Brussels, 19 November 1985

COMMUNICATION FROM THE COMMISSION TO THE COUNCIL

Chlorofluorocarbons in the environment : updating the situation

1. On 31 May 1983 the Commission sent to the Council a Communication on this subject⁽¹⁾. On 16 June 1983 the Council took note of this communication which concluded that :

"A re-examination of all aspects of the situation with a view towards taking the appropriate measures at Community level could be done, under normal circumstances, by the end of 1985".

2. Since then the European Community signed the Vienna Convention for the protection of the ozone layer on 22 March 1985 as a Contracting Party along with seven other Member States. In addition it subscribed to the Resolution attached to the Final Act of the signature, that launched the work for the preparation of a Protocol on CFCs.
3. Quite apart, however, from the work on CFCs that is currently under way under the aegis of the Vienna Convention, a full re-examination taking into account all aspects cannot be conducted at this time.

In fact, the major report containing the latest scientific information on the state of the ozone layer sponsored by WMO, NASA, UNEP, the Commission and other international organisations will be ready only at the end of 1985;

Furthermore, the Coordinating Committee on the Ozone Layer (CCOL) of UNEP will conduct its next scientific assessment of the state of the ozone layer in January 1986;

In the past the Commission has always based itself on the assessment provided by such internationally recognized authorities in order to conduct a full re-examination of the situation.

4. Annex I contains the updating of the total Community annual figures of production and sales of CFC 11, 12, 113 and 114 which the European chlorofluorocarbon producers provided to the Commission. These figures

(1) COM(83)284 Final, 31.5.1983

show that the situation continues to be the same as in previous years, notably with a reduction of 35 % in the use of CFC 11 and 12 in aerosols as compared with 1976.

5. Under the action programme in the sectors of refrigeration, foam plastics and solvents the Commission has distributed with the help of the corresponding European Industry Associations the Codes of Practice in Foam Plastics^(*), Refrigeration^(*) and Solvents^(*). These codes are currently being applied by the appropriate industries. These codes will be reviewed in the light of experience and in consultation with the industries concerned, not later than 1988.
6. Since the signature on of the Vienna Convention on the protection of the ozone layer the Commission has been participating in the international discussions concerning the preparation of the CFC Protocol. These discussions will lead to two sessions of a workshop on the control of CFCs to be held during 1986 (May and September). The aim of this workshop will be to gather all the necessary information so that all the possible options for controlling CFCs can be considered. It is expected that this exercise will then result in the preparation by UNEP of the Protocol on CFCs.
7. In the light of the developments noted above the Commission counts on being able to present a full re-examination of all aspects of the situation concerning CFCs in the second semester of 1986 in good time for it to be taken into account by member States and by the concluding stages of the negotiations of the CFC Protocol of the Vienna Convention. In this way there is every prospect of ensuring coherence between Community decisions and the planned international protocol. This is plainly greatly to be desired.
8. The Commission accordingly proposes that the Council should take note of this Communication and should invite the Commission to present the full re-examination foreseen by the last Communication in the second semester of 1986.
